**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

| COURSE DESCRIPTION:                                      | This course focuses on the Concepts and definitions:- Ecology   |  |  |  |  |
| Module Aims<br>أهداف المادة الدراسية                     | The goal of this course is Giving a brief overview of the importance of teaching the environment subject, and the students' knowledge of the living and non-living components of the environment, their knowledge of the environment, its components, and the factors affecting the environment through practical experiments related to these topics.  |  |  |  |  |
| Module Learning Outcomes  مخرجات التعلم للمادة الدراسية  | At the completion of the course, students are expected to be able to:  Fundamentals of ecology, what is the meaning of the environment and what is its concept, the cycle of elements in nature (biogeochemical cycles), energy and its relationship to the ecosystem, production and its relationship to the ecosystem, level of biotic tolerance and limiting factors, factors affecting organisms, life factors, environmental succession, community environment An introduction to environmental pollution, air pollution, other environmental factors pollutants, water pollution, soil pollution. Definition of the environment / components of the environment / devices used to measure environmental factors / environmental pollution / types of environmental pollution / the most important practical |  |  |  |  |
| Indicative Contents<br>المحتويات الإرشادية               | Indicative content includes the following.  1- The Princeton Guide to Ecology Edited by Simon A. Levin, Stephen R. Carpenter, H. Charles J. Godfray, Ann P. Kinzig, Michel Loreau, Jonathan B. Losos, Brian Walker, and David S. Wilcove 2- Ecology: The Delicate Balance of Life on Earth Author: Sherman Hollar 3- Environment and Ecology – Biodiversity, Climate Change and Disaster Management – Majid Husain (Access Publishers)  |  |  |  |  |

Note: Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

## Environmental pollution Department

| Week  | hours | <b>Topics Covered</b>   | Learning Outcomes   |  |  |
|-------|-------|---|---|--|--|
| 1-2   | 6     | A brief history of the emergence of ecology The History of Ecology        | Definition of ecology Branches of ecology and division Relationship with other sciences The future of ecology     |  |  |
| 3-4   | 6     | Components of the environment and their types.                            | To learn the Concept of the ecosystem   |  |  |
| 5-6   | 6     | Components of the ecosystem (living components and non-living components) | That the student learn What is the open and disturbing ecosystem and the delicate system of environmental balance |  |  |
| 7-8   | 6     | The cycle of elements in nature (biogeochemical cycles                    | That the student learn about gaseous cycles (carbon cycle, nitrogen cycle, sedimentary cycles (phosphorous cycle) |  |  |
| 9-10  | 6     | Energy and its relationship to the environmental system                   | The student learns about Energy and its relationship to the environmental system                                  |  |  |
| 11-12 | 6     | Production and its relationship to the ecosystem.                         | That the student learns the concept of the Productivity and Relationship in ecological.                           |  |  |
| 13-14 | 6     | Food Chains, Environmental Pyramids                                       | Explain everything that related with (Numeric Pyramid of Energy) - Volumetric                                     |  |  |
| 14-15 | 6     | Tolerance levels and limiting factors                                     | The student learns about Tolerance levels and limiting factors  |  |  |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

| COURSE DESCRIPTION:                                     | This course focuses on the Concepts and definitions: - Environmental Pollution  |  |  |  |
| Module Aims<br>أهداف المادة الدر اسية                   | The goal of this course is Giving a brief overview of the importance of teaching the environmental pollution subject, and the students' knowledge of the type pollutant and the source, causes & the method of treated it, through theoretical explanation and practical experiments related to these topics.   |  |  |  |
| Module Learning Outcomes  مخرجات التعلم للمادة الدراسية | At the completion of the course, students are expected to be able to: understanding the fundamentals of environmental pollution, what is the meaning of the environmental pollution and what is its concept, and having wide idea about the pollution & pollutants types and how to deal with them by knowing the source of it and how to treated it. |  |  |  |

**Note:** Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.

#### **COURSE SCHEDULE:-**

| Week  | hours | <b>Topics Covered</b>  | Learning Outcomes   |
|-------|-------|--|---|
|       |       |  |   |
| 1-2   | 6     | pollution and its types  | Learning the pollution and general information about pollution types  |
|       |       |  |   |
| 3-4   | 6     | Studying Water pollution and knowing its causes and treatment methods      | To learn how to know water pollution and treat it   |
| 5-6   | 6     | Studying Soil pollution and knowing its causes and treatment methods       | That the student learns how to deal with soil pollution and how to avoid the pollutants which its cause it  |
| 7-8   | 6     | Studying Air pollution and knowing its causes and treatment methods        | That the student learns how to deal with Air pollution and how to avoid the pollutants which its cause it & how to protect the environment                                  |
|       |       |  |   |
| 9-10  | 6     | Studying industrial pollution and knowing its causes and treatment methods | That the student learns how to deal with industrial pollution and how to avoid it & how to develop the industrial and the environment by reducing the pollutants generation |
|       |       |  |   |
| 11-12 | 6     | Studying Noise pollution and knowing its causes and treatment methods      |   |
| 13-14 | 6     | Studying Radiation pollution and knowing its causes and treatment methods  | Explain everything that related with (Numeric Pyramid of Energy) - Volumetric   |
| 14-15 | 6     | Energy and its relationship to the environmental pollution                 | The student learns about Energy and its relationship to the environmental pollution   |
